Landscaper's Choice[®]

ice melter
with CMA

NEW & IMPROVED!

Now with IB-9 BOOST™

IB-9 BOOST™ is a proprietary, organic substance that will reduce corrosion rates by 70-80% compared to other ice melters. Most ice melters on the market today are highly corrosive and damaging to the surface area. This new formulation reduces damage to concrete and metal by forming a protective coating to prevent other ingredients from entering into the pores of the surface area.

Anti-Corrosion Formula

The combination of IB-9 BOOST™ and CMA (Calcium Magnesium Acetate), which is an environmentally friendly corrosion inhibitor, makes Landscaper's Choice[®] one of the least corrosive ice melters on the market.

Fast Acting

Landscaper's Choice[®] combines the most effective deicing ingredients creating the desired reaction to initiate the deicing and meltdown. Landscaper's Choice[®] when pre-applied prevents ice and snow from bonding to the surface area. As Landscaper's Choice[®] goes to work, its time-released formula stays on the surface area longer, helping to reduce the freeze/thaw cycle.

Health and Safety

Landscapers Choice[®] is safer to handle.

Safer Ice Melter

Landscaper's Choice[®] goes after the ice and snow; clearing the way to safety. This specially formulated product contains "Dolomite" for added traction control, further enhancing performance.

Easily Dispersed & Extended Shelf Life

Landscaper's Choice[®] is specially formulated with an anti-caking agent to allow free-flowing dispersion.

Visually Measured

Not only will you see the quick action of Landscaper's Choice[®], specially coated with a green color indicator, going to work on the ice and snow, this product will allow precise spreading to ensure cost-effective dispersion.

*when used as directed

Distributed By:

ENVIRONMENTALLY FORMULATED

Environmentally formulated with soil supporting compounds that are biodegradable in soil.

LESS DAMAGE TO INTERLOCK

Reduced damage to wood and interlock makes this one of the safest ice melters.

LESS HARMFUL TO VEGETATION AND PLANT LIFE

Non-hygroscopic formulation. Less harmful to grass, trees and other vegetation.

REDUCED CORROSION TO METALS

Anti-corrosion agents reduce damage to vehicles, equipment and other metal surfaces.

DOES NOT IRRITATE SKIN

Easy to use, no protective clothing necessary. Safer for children and pets.

NON-TRACKING

Will not harm carpets and floors, and will not damage leather or footwear.*
